

In short

1. **Create tenders** to inform all applicable suppliers about material needs .
No more sending out requests for proposals.
2. **Compare** supplier's replies.
All together in one screen.
3. **Choose** the offer that best fits your needs in price, quantity and delivery time.
It's really easy!
4. **Generate the purchase order** in Exact Online with only one click
No more manual entry.

Why use a purchase portal?

Exact Online can provide a purchase order advice, but you need to decide which supplier you will send the order to. Exact lets you select the main supplier, the cheapest or the fastest supplier.

Stock positions - Purchase order advice

Refresh Reset Create purchase orders Close

Supplier assignment Shop order materials

Assign supplier Main supplier Link

- Main supplier
- Lowest purchase price
- Shortest lead time

But how can you tell which choice is best?

- Prices, lead times and even available quantities may vary.
- Purchase data in Exact are never up-to-date, since suppliers have no access to your Exact.

You could call each supplier and ask for their offer. They would send you their offers and when you received all responses, you could compare these offers and select the best fitting one. Next, you need to inform the selected supplier about your choice and send out rejections to the others. Finally you would enter the purchase order into Exact Online, which consumes time and no doubt sometimes entry errors will be made.

Solution

To optimize time and effort spent on purchasing, **chain integration** is the logical response: involve your suppliers directly in your process.

Tender ID	Account	Tender line no.	Tender line status	Item code	Requested delivery date	Requested quantity	Unit	Available suppliers	# of replies
Project stripfiguren	Quack B.V.	00.000.003	Internal / Concept	Maakartikel	20-12-2015	100	Piece	1	0

With the +Purchase Portal you can promote the projected stock shortages found in Exact Online to new tenders.

Your suppliers can respond immediately through a standardized form, stating their **prices, delivery times** and **quantities**. If you wish the system can send requests to the applicable suppliers automatically.

These responses are presented to you in a single list, allowing you to easily **pick the best proposal**, with just one click.

The system can automatically inform the chosen supplier of your approval and the other suppliers of the rejection of their offers.

Supplier	Tender line description	Tender reply no.	Reply status	ItemCode	Requested quantity	Sales unit code	Quantity offered	Purchase unit	# per unit	Shortage	Delivery date offered	Late	Nett price per purchase unit	Nett price per sales unit	CurrencyCode
Bev B.V.	GRONDSTOF	00.000.028	Accepted	Grondstof	1500,00	kilogram	2500	lb	0,50	250,00	14-12-2015	0	35,00	17,50	EUR
Coating Service B.V.	PCB	00.000.049	New	Standaard PCB	40,00	Piece	0	pc	1,00	40,00		0	0,00	0,00	EUR
Beta Tech	PCB	00.000.048	Offered	Standaard PCB	40,00	Piece	35	pc	1,00	5,00	18-12-2015	2	14,95	14,95	EUR

The approved proposal can either be **promoted to a purchase order** in Exact Online right away, or you can have it reviewed by a manager first. Either way, the prices, delivery times and quantities that were offered by the supplier, will be copied into the purchase order by the system, not manually.

Besides this, the +Purchase Portal provides a wide variety of possibilities for communication, that can be linked to tenders, replies, accounts, contacts and more. For example attachments, questions and to do's.

USP's

- Chain integration,
- Sends out requests for proposal for all applicable suppliers at once,
- Based on projected stock in Exact Online,
- Easily compare proposals,
- Automatic information about approval and rejection,
- Automatic entry of purchase orders,
- Users don't need Exact Online license to view accounts, items and stock positions nor to create purchase orders.
- Extended workflow system offering to do's, questions and attachments.
